

## TRUST COMPANY RENDERS SERVICE TO THE LIVING

Manager Trust Department of  
Bank of Hardinsburg Points  
Out Valuable Services of  
This Dept. to The Living.

BY GEO. E. BESS.

Too many people have the opinion that a trust company can be of service only in the administration of their estates—in other words, after they are dead. Now while this is a very important function of a trust company, it is only one of the many features which it renders to the community, for its services to the living may be called quite as important.

There comes a time in the lives of business and professional men when they would gladly welcome the opportunity to retire from their activities yet they fear to do so in the thought that they have none to whom they can entrust the care of their many interests whether purely of business or in the caring for the investment of their property.

It is to these men, as well as to men and women in private life, that a trust company can render the very greatest service by taking up all their business cares and permitting them to enjoy the leisure they desire.

**To Make It One's Agent.**

By making a trust company one's agent, powers are conferred upon the company to collect rents, to pay interest on funds when necessary, negotiate and make loans on real estate or approved collateral, collect dividends, to supervise the management of industrial enterprises—in short in all ways in which individuals themselves can act to conserve and safeguard their property.

Moreover, the trust company as an agent affords this great advantage—that should the occasion arise for the necessity of ready money in order to carry an investment or to purchase bonds or stocks particularly attractive to the officers of the company acting in the interest of the estate are in a position, if they deem it advisable, to procure funds for such purpose and thus the safeguarding or enhancement of the estate is not handicapped as it often is when an individual has charge of it who is unable to obtain ready money.

**Competent Men Chosen.**

Again the officials of a trust company are men chosen for their ability in various lines such as knowledge of investments and real estate. Therefore, without additional cost to the property, they furnish expert opinion and frequently enable the property owner to receive the benefit of advice which oftentimes would cost him thousands of dollars.

The incomes from the property are forwarded to any part of the world in which the owner may be traveling, or disbursed in any way that he may direct—and back of all these services lies the fact that the property so entrusted to a trust company is thoroughly safeguarded by its capital as well as by the laws under which it operates.
